

COCHISE COUNTY MAKING GOOD HEADWAY

Warren District And
Mines in other Sections
Are Active

(From Saturday's Daily)
Mining operations in the Warren district will continue along the same lines as in the past year, and the various producing properties will not out their production because of the low price of copper, as has been rumored.

The Denn-Arizona Co., which resumed work a week ago, has sunk its shaft about 12 feet since that time, and its depth is now approximately 1225 feet.

The Powell shaft of the Calumet & Arizona Co. has reached a depth of 320 feet. The new Allis-Chalmers 12-inch by 15-inch double-drum geared electric hoist is being prepared for installation. It will be operated by a Westinghouse type "P" 90-h.p. induction motor. The first station in the new property will shortly be commenced at about 300 feet.

The new 1500-foot station at the Houston mine of the Superior & Pittsburgh Co. has been completed and a pump will soon be installed. Stopping has been commenced in the large ore body on the 1300-foot level.

A crank and flywheel Prescott pump is being installed on the 1500-foot level of the Junction mine. This is the third pump of this pattern installed at the Junction.

A 6-drill Sullivan air-compressor was recently installed and is now in use at the Bisbee Extension mine.

The Centurian-Arizona Co., near Dragon station, will sink its incline shaft, now 135 feet deep, an additional 100 feet before the vertical shaft is begun. Nine feet of high-grade oxide ore occurs in the main drift.

The Empire Copper Co., operating in the Dragon mountains, has arranged to take over the property of O. T. Smith. It is understood that the Empire Co. will install a gasoline hoist and erect a gallows frame on the old workings of the property.

Work is about to commence on the Copper Basin claim of the Shelor group of the Tombstone Gold, Silver & Copper Co., and the Shelor tunnel, already driven some 75 feet, will be continued in order to tap the ledge which outcrops above. Some excellent samples of copper ore have been encountered. A. T. Schuster is superintendent.

The Chicago & Patagonia Mining Co., whose property is in the Patagonia mountains, Santa Cruz county, has recently made a discovery of over 5 feet of rich ore at 70 feet in a prospect shaft 1000 feet each of the Old Soldier shaft.

ONE MAN KILLED IN EXPLOSION

PATTERSON, N. J., April 9.—One man was killed by a terrible explosion at the Wayne Powder Works at Wayne, N. J., today, which demolished most of the buildings.

THAT "GLORY HOLE" BETTER WITH DEPTH

Paystreak is Four Feet
Thick and Of
High Grade

(From Saturday's Daily)
Reliable information from the Glory Hole in the Northern Arizona mine received here yesterday is that the property is improving as development progresses. The paystreak is four feet in thickness, all carrying high grade gold values, six inches of which is in the bonanza class, ranging from thousands of dollars to the ton to one-fourth pure gold.

Development of a number of neighboring properties is being pushed and a number of very promising finds have been made last week. From \$3,000 to \$5,000 a day is being taken from the Glory Hole. This is still attracting hundreds of miners from other states, every one of whom expressed themselves as being satisfied that it is the richest gold find they ever saw.

Miners who have been following every rich discovery made in the Rocky Mountain region in the last quarter of a century are astounded at the richness and quantity of the bonanza ore. They are scattering all over the district in search of other rich deposits, confining their explorations largely to the contact on which the Glory Hole is located. Several miners secured leases on adjoining properties last week and are already working in good ore.

MINE CONCENTRATES.

Ex-Governor Wolfley, who returned from Los Angeles a few days ago, is making ready to start up work on the properties of the Climax Mining Company, located a few miles from Tucson.

The Territorial law relating to the location of mining claims has been amended, and the number of feet of location or initial work now necessary to be done on each claim is eight feet, instead of ten as heretofore. The new bill became a law on being signed by Governor Kibbey March 16, and it will apply to all locations made within 90 days prior to that date.

P. B. Dreiser, who left here last week for his holdings, also near the Glory Hole, is prospecting his veins with a view of locating a tunnel site.

The output of the Copper Queen group at Bisbee (all included) exceeded the Goldfield and Cripple Creek output in 1907 by four millions.

TWENTY INJURED IN EXPLOSION

ROME, April 9.—A serious explosion occurred this morning in a four-story house. Twenty persons were injured and the building destroyed. It is thought dynamite stored in the house by fishermen for illegal fishing exploded accidentally.

NEW GOLD STRIKE OVER IN PINAL COUNTY

Seven Miles North Of
The Townsite Of
London

Seven miles north of the old Peter Winkelman ranch, now known as the townsite of London, and immediately north of the property of the London-Arizona Mining Company, a gold strike has been made that is expected to start a stampede to that district. The strike has been made upon a ledge from nine to ten feet wide and which has been traced for a mile. Wherever it has been prospected ore has been found running hundreds of dollars to the ton in the yellow metal.

Bates and Sears were grubstaked by Mr. Gardom and Phil Grigsby of Florence and started out on a prospecting trip. At the suggestion of Mr. Gardom they went into the Winkelman country and began to prospect around the London-Arizona property. Mr. Gardom made this suggestion because of some rich gold ore he had seen from a claim owned by Frank Harbin just north of the London-Arizona. Sears and Bates found ore far surpassing that of Harbin. Harbin helped them locate ten claims upon the ledge and has become their partner. These ten claims, therefore, are owned by Bates, Sears, Gardom, Grigsby and Harbin.

They have set a price of \$100,000 on their property as a starter. A Los Angeles mining expert named Campbell offered Gardom \$2000 cash for a ten days' option at \$100,000. As Harbin, Sears and Bates could not be seen at that time, the option was not given. Campbell has gone to Los Angeles to interest in the find capitalists with whom he is associated.

Gardom left Phoenix early in the week for Kelvin. At that place he could not learn where Bates and Sears were, as they had been keeping their location of the find a secret. Mr. Gardom when down to the depot to catch a train for Florence, where he intended to see Grigsby and have a look at the ore. Grigsby happened to be upon that train, having just come from the strike. He had a sack full of ore, much of which carried pieces of gold as big as peas.

"We do not claim that our ore is as rich as that taken from the 'glory hole' at the Salome strike," said Mr. Gardom today. "We do claim, however, that it runs well up into the thousands and that there is no pocket. The rich ore is all along the ledge." The heavy nature of the ore was between lime and quartzite and occurring at a contact with a porphyry dike. Campbell remarked that the formation alone would convince any mining man of the presence of an ore body of incredible extent.

The Winkelman and Kelvin districts are excited over the find. The secret of its location has just been divulged and already the miners are rushing to the new gold field.—Tucson Citizen.

PAUL AT ASYLUM

(From Saturday's Daily.)

Believing that he was on his way to the capital to invoke Governor Kibbey to punish the officers whom he believed had doped him, Thomas H. Paul, insane, arrived at the territorial asylum for the insane at Phoenix yesterday in custody of Deputy Sheriff Joe Cook. Paul was immediately given into the custody of the asylum authorities.

The man refused to board the train with Officer Cook here, but after being handcuffed and placed on board was quieted by being informed by the deputy that he was taking him to see the governor, who would discharge the officers who had doped him. He did not resist Deputy Cook or make any further trouble after he was satisfied that he was on his way to meet the governor.

BIG JIM MAY FIGHT YET.

Will Give San Francisco Offer First Consideration

SAN FRANCISCO, April 9.—Some time ago John Gleason, the manager of the Recreation Baseball Park, wired to Jeffries he would offer a purse of \$50,000 if he would fight a twenty-round bout with Jack Johnson, the negro. Today he received a telegram from Sam Berger, Jeffries' manager, stating that if Jeffries decides to re-enter the ring he would give the San Francisco offer his first consideration.

Are You a Lard Eater?

Half the time when a person feels blue and out of sorts you may take it for granted that he is a victim of the "lard habit." Lard-cooked food and good stomachs are never friends for long. Lard food is not healthful food and no ordinary stomach can thoroughly digest it.

Lard comes from the pig-sty; *Cottolene* from the cotton fields of the Sunny South. Lard is greasy, indigestible, and sometimes absolutely harmful; *Cottolene* makes food digestible, nutritious, delicious. *Cottolene* is the perfect shortening and frying medium. It is pure and healthful. It contains not an ounce of hog-fat.

Cottolene is today in use by thousands of housewives who would no more think of going back to lard than they would of reverting to tallow dips for lighting their homes.

Cottolene is one of the products which pure food advocates always endorse.

COTTOLENE is Guaranteed Your grocer is hereby authorized to refund your money in case you are not pleased, after having given *Cottolene* a fair test.

Never Sold in Bulk *Cottolene* is packed in pails with an airtight top to keep it clean, fresh and wholesome, and prevent it from catching dust and absorbing disagreeable odors, such as fish, oil, etc.

Cook Book Free For a 2c stamp to pay postage, we will mail you our new "PURE FOOD COOK BOOK" edited and compiled by Mrs. Mary J. Lincoln, the famous Food Expert, and containing nearly 300 valuable recipes.

"Nature's Gift from the Sunny South"

NEATLY CAPTURED BY THE UNDER SHERIFF

Edward Glasson, Wanted
At Phoenix Is
Caught

(From Saturday's Daily)

Under Sheriff C. M. Raible made his first important capture Thursday night when he recognized and took into custody Edward Glasson, wanted in Phoenix to answer to a charge of embezzlement. Officer Raible recognized Glasson from a description furnished by the Phoenix officers, in the post office. He waited until Glasson stepped to the sidewalk and placed him under arrest.

Glasson was surprised when informed that he was under arrest. He said that he had not committed any overt act that would justify his incarceration. He did not deny his identity. He asked on what charge his arrest was based and when informed refused to answer further questions or discussion of the case. He was locked in the county jail for the night.

The sheriff's office of Maricopa county was notified of the arrest. Deputy Sheriff Wayne Davis arrived here this morning and returned later with the prisoner to Phoenix.

Glasson was employed in Phoenix as bookkeeper for the Vito Nuevo Mineral Springs Company. He came to this city eight days ago. He rented a small house in West Prescott from H. F. Tinsler. Until his arrest he had not been seen on the streets. He went to the postoffice to call for his mail under cover of darkness, where he was recognized by Under Sheriff Raible. The amount of the alleged embezzlement was not made public.

YALE AND PENNSY

Are Getting Ready for the Big Race on the Skuykill

PHILADELPHIA, Pa., April 9.—The Yale and University of Pennsylvania crews were on the Schuylkill today for their final practice spins before the big race in which they are to engage tomorrow. Both crews appear to be in excellent form. The Eli crew, though created from green material, is said to be up to Yale's best standard, and while it is known that the Quakers have one of their fastest eights in recent years Yale is expected to prove a tough proposition for Pennsylvania to crack.

AERONAUTS HAVE ACCIDENT

MILAN, Italy, April 9.—An empty balloon came down near Conti today. Apprehension is felt for the three aeronauts in the airship from Paris, two of whom were Captain Mayor and Lieut. Gardiot A. Patterson. It is supposed the balloon was caught in a storm and the passengers were thrown out. A searching party found articles belonging to the occupants.

UP TO SENATE TARIFF STUNT GOES

Senate Committee Closes
Doors so Outsiders
Won't Hamper

FREE HIDES ARE LIKELY AND
FREE DRINKS

THE CENSUS ALSO COMES IN FOR
DEBATE AND ENUMERATORS
WILL BE SUBJECT TO
CIVIL SERVICE

By Associated Press.

WASHINGTON, April 9.—When the senate committee on finance concluded its session tonight, they let it be understood that all avenues to the committee room will be closed, and a few sessions will be held prior to reporting the amendments to the Payne tariff bill in which the committee will not be hampered by suggestions from the outside.

The committee is now preparing to insert the rates on certain important articles. Amongst the schedules attracting particular attention are metals, manufactured metals, lumber, hides, bituminous coal, and sugar. No rates on steel are yet inserted, although it is practically settled that iron ore will be taxed twenty cents a ton, and proportionate rates assessed against scrap iron and steel refuse, fit only to be remanufactured.

It is said the committee will reduce the existing Dingley rates on lumber one-half. A canvass of the senate indicates that an effort is the direction of securing free lumber, if made after the bill has reached the senate, will be unavailing.

Hides are likely to be taken from the free list, and a duty fixed at 15 per cent ad valorem.

Democratic members of the senate committee on finance will get their first view of the tariff rates fixed by the majority of the committee, at a special meeting of the full committee Sunday. Aldrich intends to report his amendments Monday.

Discuss Census Bill Five Hours

WASHINGTON, April 9.—For nearly five hours the bill providing for the thirteenth and subsequent censuses was discussed in the senate. The measure has been amended since its original passage by congress at the last session when it was vetoed by Roosevelt because of the provisions allowing senators and representative practically to make the selections.

These features called for a general discussion of the subject of civil service reform and the present operation of the law, both of which were denounced by several senators.

As amended the bill places the census appointment under the civil service commission. The consideration of the bill was still in progress when the senate adjourned.

TAFT HAS WON A SIGNAL VICTORY

He Secures Free Sugar
For Phillipino
Producers

THEY CAN NOW SHIP TO THE
UNITED STATES

ABOUT 300,000 TONS ANNUALLY
OF THIS PRODUCT, BUT
MUST PAY ON
RICE

By Associated Press.

WASHINGTON, April 9.—President Taft won a signal victory for the Philippines in the acceptance by the senate committee on finance late tonight of a provision in the Payne tariff bill for the free admission of 300,000 tons gross, annually, of Philippine sugar.

The amendment to the Philippine section was prepared by Senators Lodge and Smoot, and was adopted by the committee. It was designed to prevent the substitution of Java sugar or sugar of other islands in the far east, and the importation of a large tonnage of products into the United States free of duty. This was accomplished by requiring the collection of a duty equal to the amount due on all sugar imported by the Philippines except from the United States.

The Philippine customs service requires that a strict account be kept of all exportations of sugar from the islands. It is believed this will afford an ample safeguard to American sugar producers. The yearly production of sugar in the islands is about 100,000 tons.

STANDARD TANK EXPLODES AT POINT RICHMOND CALIFORNIA

By Associated Press.

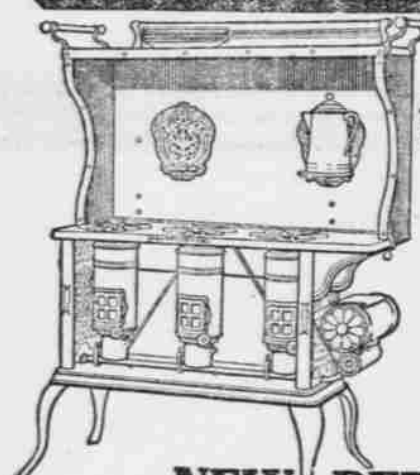

OAKLAND, April 9.—Two men were burned to death, three seriously injured, and one other man died as a result of an explosion of oil stills of the Standard Oil Company at Point Richmond this morning. The fire scattered over eight acres and was fought for an hour by fifteen hundred men. The loss is \$50,000.

The dead are John Granger, the gate keeper, 70 years old, Chas. Lawrence, chief clerk of the marine department, age 30. Both were covered by burning oil. Teamster Perald may die.

The still that exploded had a capacity of 10,000 barrels.

FAMOUS WRITER DEAD.

SORRENTO, Italy, April 9.—F. Marion Crawford, the writer, is dead.

Don't Heat the Kitchen

All the necessary family cooking may be done as well on a New Perfection Wick Blue Flame Oil Cook-Stove as on the best coal or wood range. By using the "New Perfection" Oil Stove, the annoyance of an overheated and stuffy kitchen is entirely avoided, even in midsummer. The scientific construction of the

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

ensures quick work and a cool kitchen. The "New Perfection" has a substantial CABINET TOP for warming plates and keeping food hot after it is cooked. Also drop shelves on which to set small cooking utensils—every convenience, even to bars for holding towels.

Made in three sizes. Can be had either with or without Cabinet Top. If not at your dealer's, write our nearest agency.

The Rayo Lamp

is substantially made of brass, finely nickelled and very handsome. Gives a powerful light and burns for hours with one filling. Portable, safe, convenient—just what every home needs. If not with your dealer, write our nearest agency.
